Presentation to Investors
January 2016

The information contained in this presentation is intended solely for your personal reference. Please do not circulate this material. If you are not an intended recipient, you must not read, disclose, copy, retain, distribute or take any action in reliance upon it.

VISION	A LEADING FULLY INTEGRATED REFINING & PETROCHEMICAL COMPANY IN ASIA PACIFIC
MISSION	<ul style="list-style-type: none"> • To be in top quartile on performance and return on investment • To create a high-performance organization that promotes teamwork, innovation and trust for sustainability • To emphasis good Corporate Governance and commit to Corporate Social Responsibility
VALUES	<div> <div> Professionalism Ownership & Commitment Social Responsibility </div> <div>  </div> <div> Excellent Striving Vision Focus Initiative </div> </div> <p>Integrity Teamwork & Collaboration</p>

Corporate Governance Policy

The board of directors, management and all staff shall commit to moral principles, equitable treatment to all stakeholders and perform their duties for the company's interest with dedication, integrity, and transparency.

Roles and Responsibilities for Stakeholders

- Truthfully report company's situation and future trends to all stakeholders equally on a timely manner.
- Shall not exploit the confidential information for the benefit of related parties or personal gains.
- Shall not disclose any confidential information to external parties.

CG Channels

Should you discover any ethical wrongdoing that is not compliance to CG policies or any activity that could harm the Company's interest, please inform:

ROBECOSAM
Sustainability Award
Industry Leader 2015

ROBECOSAM
Sustainability Award
Gold Class 2015

MEMBER OF

Dow Jones
Sustainability Indices

In Collaboration with RobecoSAM 

3 consecutive years for Member of DJSI Emerging Markets & 2 consecutive years for

- Highest Ranked Level in RobecoSAM Gold Class of Global Oil & Gas Companies
- No.1 in ENERGY industry around the WORLD (Industry Group Leader)
- No.1 in Oil & Gas Producers Worldwide (Industry Leader)

TOP GROUP BUSINESS OVERVIEW

KEY FINANCIAL HIGHLIGHTS

STRATEGIC INVESTMENT PLANS

MARKET OUTLOOK

APPENDIX

TOP Group Business Overview

Thai Oil's strong shareholder base

- Benefits from PTT's dual role as our major shareholder and key business partner
- All transactions take place at arm's length and in adherence with strong corporate governance principles

Key strategic benefits for Thai Oil

1. Long-term strategic partnership

- Thai Oil is PTT's principal refiner
- Long-term strategic shareholder and joint investment

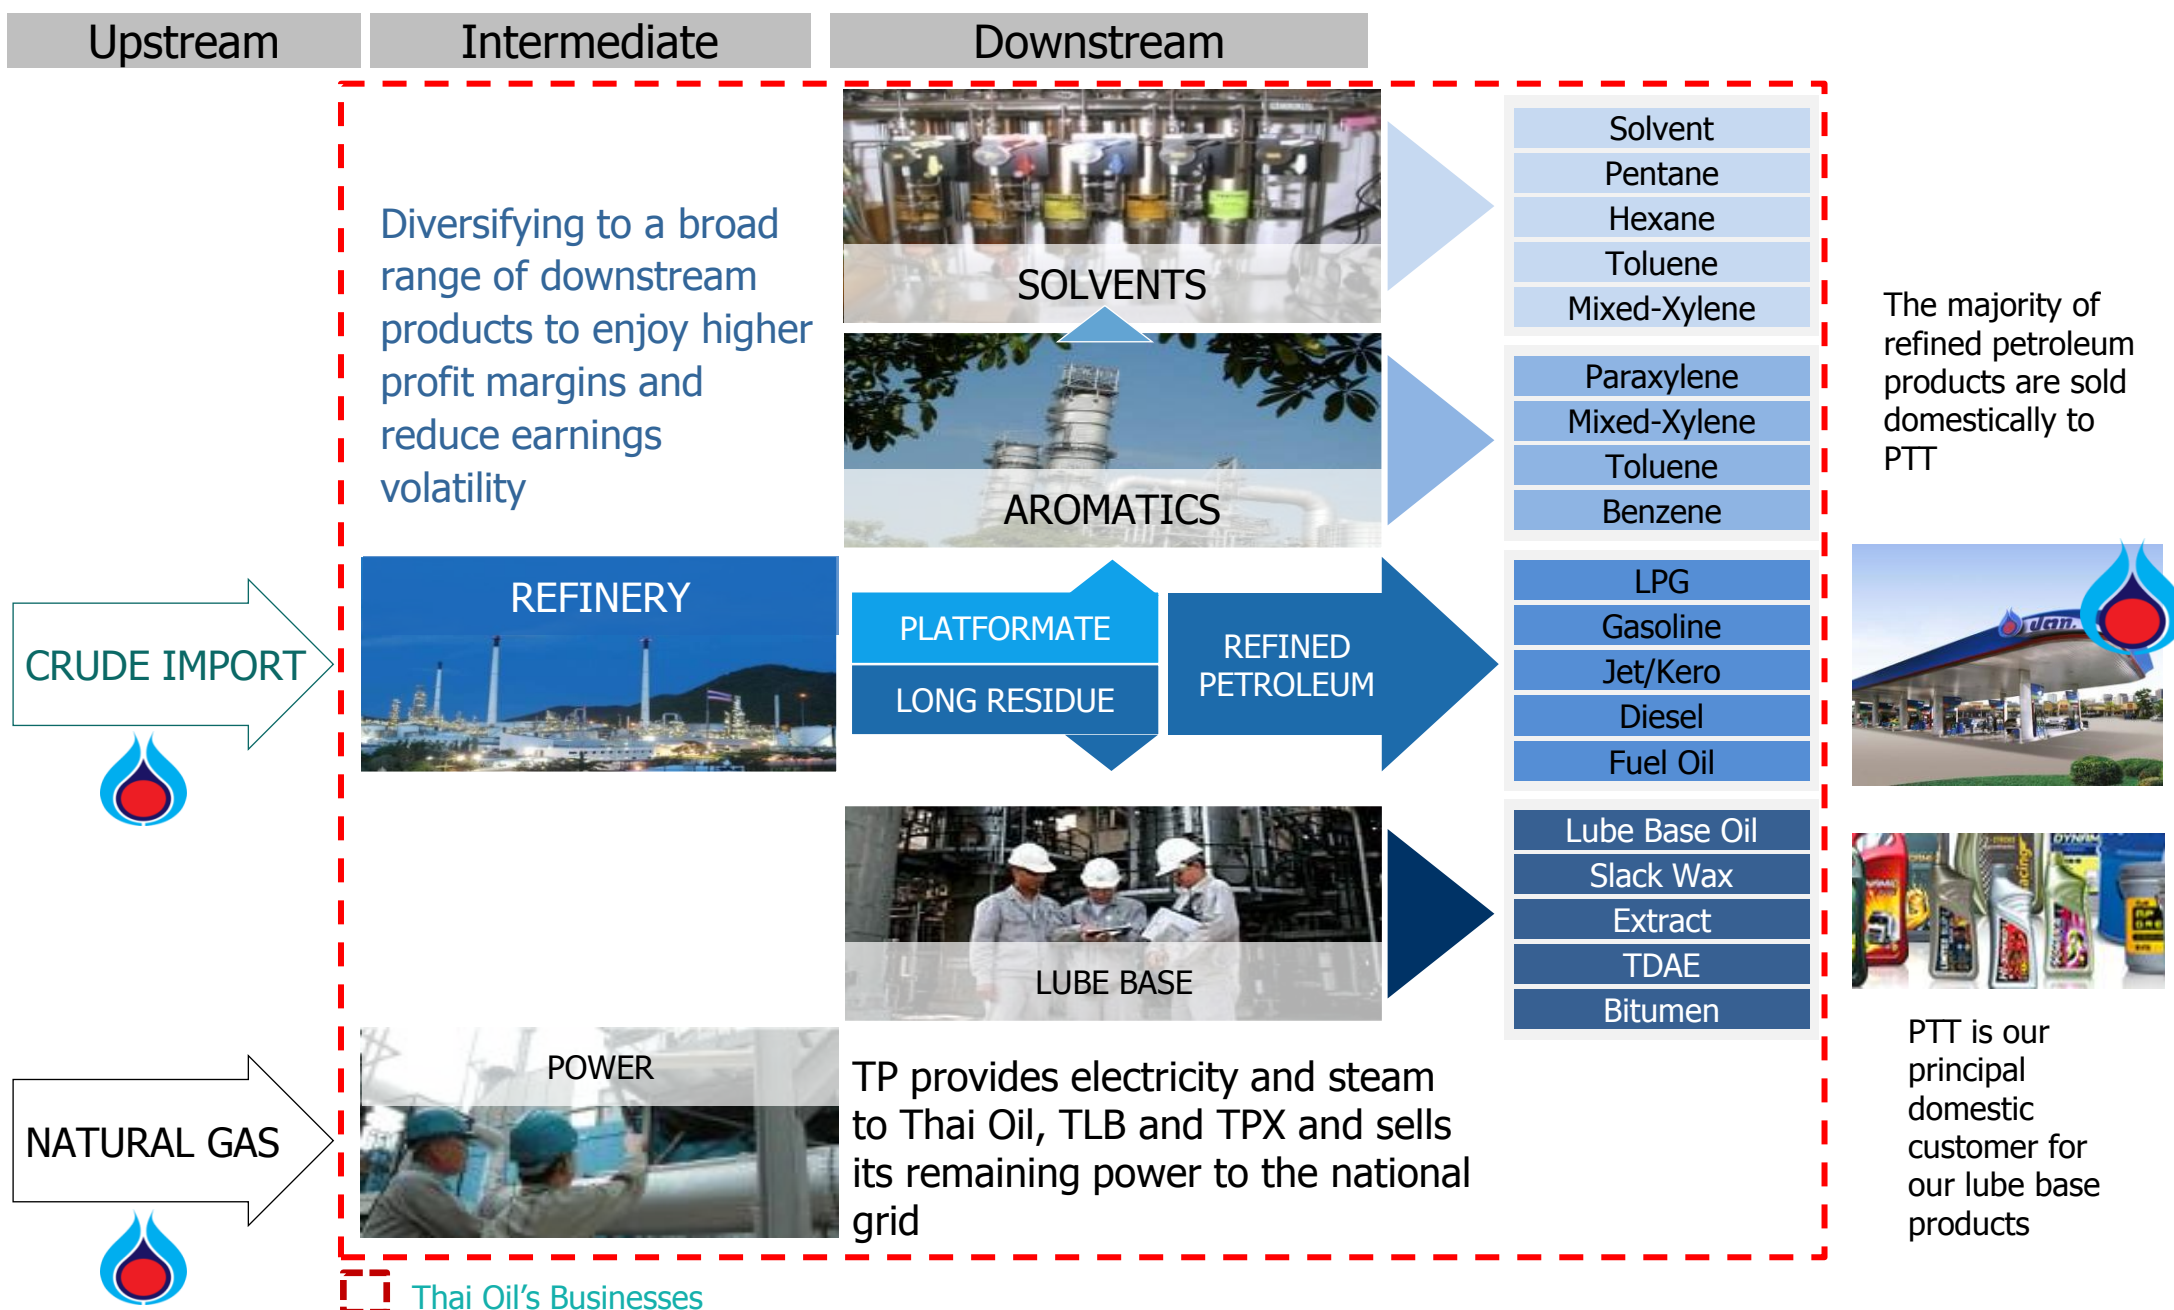

2. Business partnership

- Product offtake
- Crude procurement

3. Operational synergies

- Freight costs reduction
- Knowledge transfer and shared services
- Close management collaboration and secondment of trained staff

TOP Group Synergy & Strategic Role in PTT Group Value Chain

Key Milestones: 54 Years, A Long Track Record of Success

Note 1. Based on our internal estimates using the methodology of the Nelson Complexity Index 2. The Electricity Generating Authority of Thailand ("EGAT") is the national grid

One of Region's Leading Refineries

Total Thailand crude refining capacity 1,252 kbd

Market shares for refined petroleum product³

Nelson Index - Regional Comparison

Remarks:

- Nelson Complexity Index measures refinery's upgrading capability for comparison
- It is the ratio of complexity barrels divided by crude distillation capacity

Source: The company and broker research

Note:

1. Source: Energy Policy and Planning Office, Ministry of Energy Thailand,

2. PTT holds a 38.51% interest in IRPC, a 48.9% interest in PTTGC, and a 36% interest in SPRC

3. Calculate by total domestic sales of refined petroleum products of Thai Oil in 2014 divided by total sales of petroleum products in Thailand in 2014 excl LPG. Source from EPPO

4. Based on our internal estimates using the methodology of the Nelson Complexity Index.

Strategic Location with Competitive Advantages in Access to Key Markets

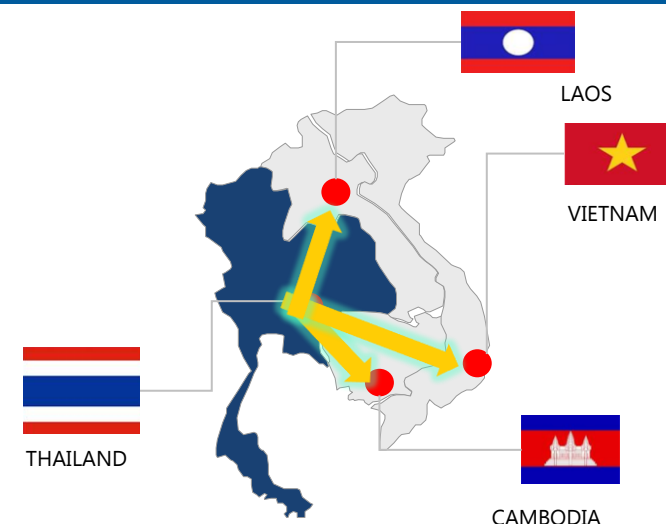

Close proximity to the key domestic markets

Our strategic location provide us with

1. Close proximity with the key domestic markets and Indochina
2. Direct access to deep water ports
3. Direct connection with multi-product pipelines

Access to Indochina markets through deep water ports

Direct connection with product pipeline system

  Product pipeline system

- ✓ Our plants are located within the Sriracha Complex
- ✓ SBM provides direct access to deep water ports, and ability to receive feedstock directly from VLCC
- ✓ We also enjoy available connections to delivery networks such as multi-product pipelines, including Thappline

Thai Oil is able to diversify its type of crude intake and product outputs to maximize demand and margin

- Flexibility in crude intake allows diversification of crude types to source cheaper crude
- Flexibility in product outputs by maximizing middle distillates (jet and diesel) by adjusting production mode to capture domestic demand and price premium
- Maximize Platformate production to capture higher margin on aromatics
- Minimize fuel oil output to avoid lower margin products

Operational Performance Review

Hydrocarbon Management Review

Operational Troubleshooting

Staff Competency Development

Knowledge Management & Research

Thailand's largest and one of the region's most advanced and competitive refineries

1

Diversified earnings through integration with, and significant contribution from, our subsidiaries

2

Strategic relationship and operational integration with PTT as the Group's principal refiner

3

Strategic location with competitive advantages in access to key markets

4

Industry with high barriers to entry and strong market positioning

5

Technological superiority, logistical advantages & cost leadership

6

Highly experienced management team

7

Strong financial profile

8

Key Financial Highlights

Q3/15 Key Industry Highlights

Refinery

- **\$17/bbl drop in Dubai crude price** as abundant OPEC supply, soften Chinese econ and expected more supply from Iran
- **Lower middle distillate cracks but partially offset by declined crude premium, lower F&L and freight cost**

Implication

- **4.9 \$/bbl inventory loss**
(from stock gain 2.5 \$/bbl in Q2/15)
- **Moderately soften GRM**
(from 7.4 to 6.6 \$/bbl Q/Q)

Aromatic

- **Soften PX spread** as several PTA plants reduced operating rate from low margin
- **Dropped in BZ spread** due to lower Chinese import while higher supply from Olefin plants

- **Declined Aromatic Margins**
(GIM contribution from 0.8 to 0.5 \$/bbl Q/Q)

Base Oil

- **Rising Base Oil / Bitumen spread** supported by sharp drop in fuel oil while weak demand during monsoon seasons and slow purchase during downward price trend pressured selling price

- ↔ **Maintained Base Oil Margins**
(GIM contribution from 1.0 to 0.9 \$/bbl Q/Q)

\$/BBL	Q3/15	Q2/15
Market GIM	7.8	9.0
Stock Gains / (Loss)	(4.7)	2.4
Accounting GIM	3.1	11.4

Refinery + Aromatics + Base Oil

Q3/15 Key Operation and Financial Highlights

Operation / Financial Highlights

	Utilization Rate
Refinery	107 %
Aromatic	91 %
Base Oil	87 %

- Maximized refinery run to capture strong GRM & optimized run for Aromatics & Lube

- Contribution from other subsidiaries ~ 333 MB
- Commodity hedging gain ~ 547 MB
- Lower group cash cost ~ 0.2 \$/bbl Q/Q from interest cost & cost management program (group cash cost 1.9 \$/bbl in Q3/15 vs. 2.1 \$/bbl in Q2/15)
- Inventory NRV ~ (201) MB
- FX losses as THB depreciation (mainly from unrealised translation loss on USD debt) ~ (2,568) MB
- 11% Effective tax rate for 9M as utilizing BOI Tax privilege

TOP Group Net Profit

Unit : million THB (MB)

- Net Operating Profit (before tax)
- Stock G/(L) (before tax)
- Reversal of NRV/(NRV) (before tax)
- Others i.e. FX G/(L), Hedging G/(L), tax expense etc.

*redeemed BOI privilege for tax exemption on environmental projects in Q2/15 = 795 MB, Q3/15 = (742) MB, 9M/15 = 769 MB

 (5) ASEAN-5 includes Thailand, Malaysia, Indonesia, Vietnam, Philippines

Global Oil Demand Growth Projection

IEA forecasted 2016's global oil demand to increase by 1.2 MBD mainly from Asia

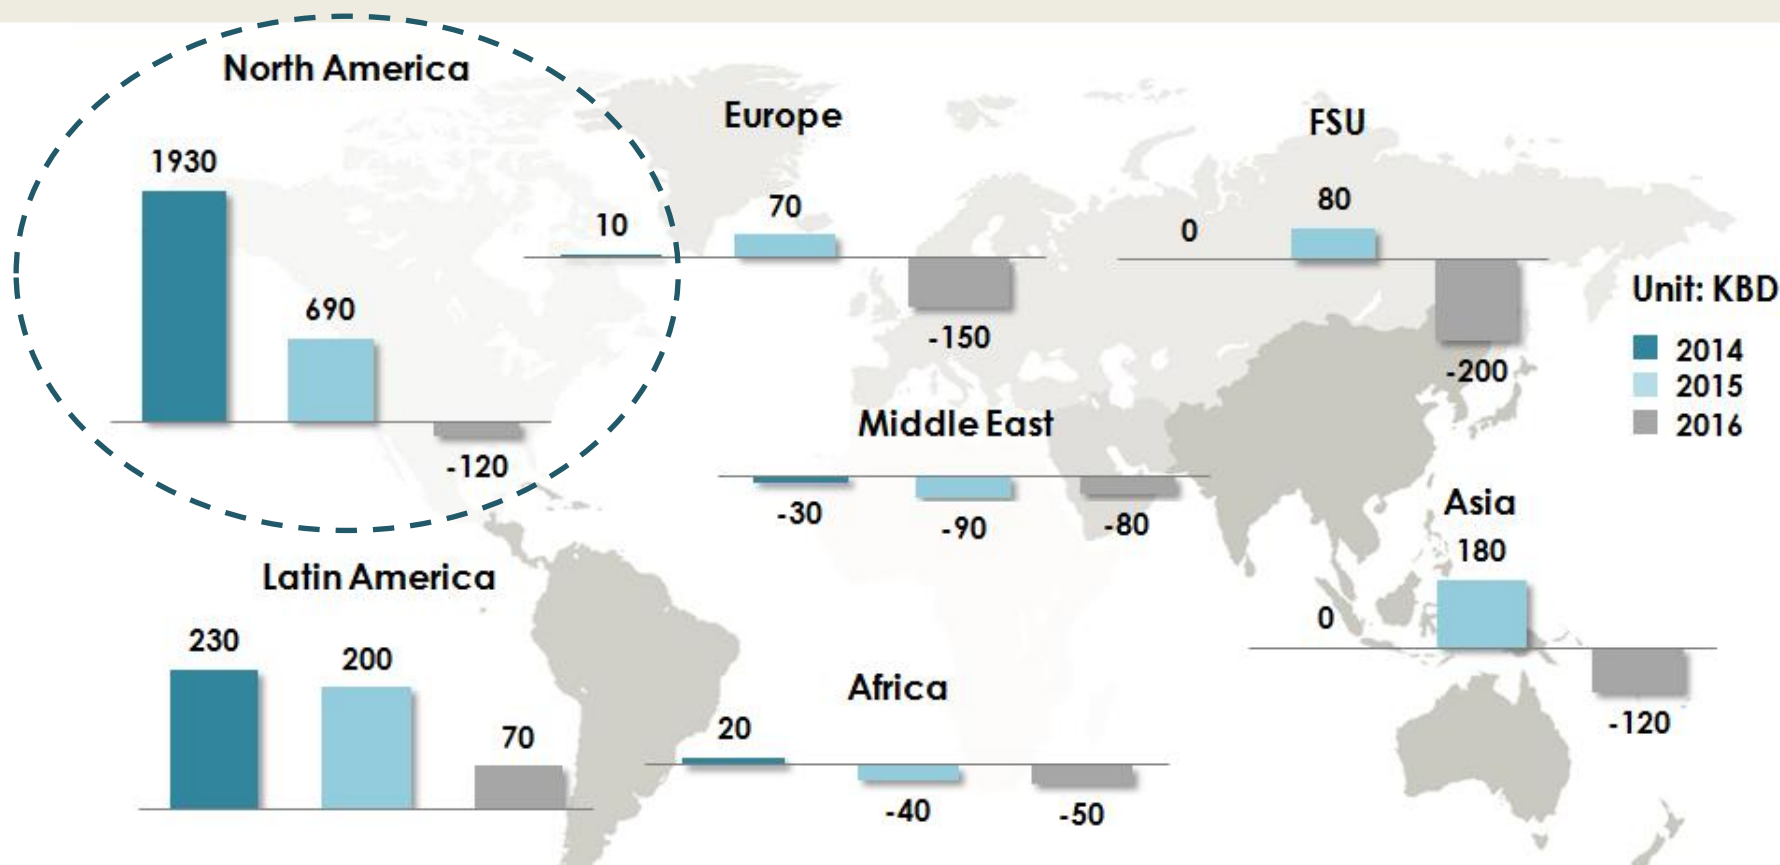

IEA	Demand (MBD)	Growth (MBD)
2014	92.8	0.9
2015	94.5	1.7
2016	95.7	1.2

■ The global oil demand will grow by **1.2 MBD in 2016**, as economic growth solidifies and consumers respond to lower oil prices.

Non-OPEC Supply Growth Projection

IEA estimated 2016's Non-OPEC oil supply growth to contract by 600 KBD

Remarks: Non-OPEC Supply excl. Biofuels/Processing G/(L)

IEA	Non OPEC Supply (MBD)	Growth (MBD)
2014	52.7	2.2
2015	53.7	1.1
2016	53.1	-0.6

- As lower prices and reduced spending take their toll, non-OPEC supply growth is expected to decelerate sharply through 2015 and decline in 2016 – with US growth hit hardest.

Crude Market Outlook 2016:

Prices on the Recovery Track but Capped by Downside Risks

Dubai Price Movement

Key Highlights:

1

Slowing non-OPEC oil supply growth to support price recovery

2

Strong Chinese crude demand despite the slowing Chinese economic growth

3

Arrivals of additional Iranian barrels

① Slowing U.S. Oil Supply Growth to Support Price Recovery

A Declining Oil Rigs Signals Lower U.S. Oil Supply

B Declined U.S. Shale Oil Production

C Non-OPEC Supply Growth Slowdown

D Lower non-OPEC Supply to Drive the Rebalance

2

Strong Chinese Crude Demand Despite the Slowing Chinese Economic Growth

A Still-High Chinese Crude Imports

Sources: FACTS (Oct'15), IEA (Oct'15)

B Rising China's Foreign Crude Dependency

Source: FACTS

C China's Strategic Crude Reserve Plan

Sources: FACTS, IEA (Oct'15)

D Teapot Refiners Access to More Imported Crude

Strong Thailand oil demand in Y2015

- ▶ Rapid growth of Gasoline and Gasoil demand supported by lower retail price
- ▶ Strong Jet demand as a result of healthy tourism sector

Moderate Thailand's oil demand in 2016

- ▶ Healthy Gasoline and Gasoil demand supported by lower retail price and the expectation of economic improvement
- ▶ Limited Jet demand as constraint of DMK and SBA airport capacity

Remarks: (A) Mogas and diesel included ethanol and biodiesel, respectively

(B) PTT Estimation (as of Oct 2015)

(C) BOT Estimation (Monetary report as of Sep 2015)

AROMATICS

Aromatics

Q3/15: Performance Breakdown

Utilization/Production (%) & Net Profit (million THB)

Key Points

- **TOP:** max run to capture strong GRM
- **TPX:** soften contribution from lower P2F
- **TLB:** stable contribution as lower P2F offset by lower production cost
- **TP:** lower utilization from plant M/T end of quarter
- **TS:** lower NP as decreased gross margins and revaluation of inventories
- **TM:** better contribution from crew boat business subsidiaries
- **TET:** slow Thailand ethanol demand and high price competition

APPENDIX

- World GRM / Inventories
- Thailand petroleum demand by products

Asian Margin Vs. US-EU margin

Crude Inventory

Global Distillate Inventory

Fuel Oil Inventory

China's Product Export

Domestic LPG Demand

Thailand LPG Demand

LPG Demand by Sector

LPG Demand Highlight

- In first 11 months of 2015, LPG demand fell steeply by 10.1%YoY on account of lower usages in cooking, transportation and petrochemical sectors. Most of the decline came from cooking sector that faced higher retail prices and slowly-than-expected improvement of economy. Meanwhile, industrial usage was seen slightly higher on lower retail prices referring to last year.

Outlook for 2015

- LPG demand is expected to dropped by 4.5% YoY pressured by the expectation of lower demand in auto and cooking sectors as increased of LPG price and slowly-than-expected improvement of Thai Economy
- However, the slowdown of LPG demand was expected to limit by higher usage in industry sector as lower price compared to last year

Domestic Gasoline Demand

Thailand Gasoline Demand

Gasoline

Gasoline Demand by Grade

Mogas

GASOLINE Demand Highlight

- In Jan15-Nov15 period, Mogas demand jumped sharply by 13.4% from the same period last year to an average 26.16 mml/day. This was mainly due to a significant drop in retail prices and low-based last year which had the political protest in BKK. In fact, the gasohol portion increase significantly to 94.8% of total gasoline as a result of lower proportion of ULG95 from to 5.2%, according to wider price gap of ULG95 and GSH.
- The level of domestic ethanol demand, in first 11 months of 2015, jumped sharply by 10.4% YoY from 3.20 mml/day to 3.54 mml/day following the rising of Mogas demand. Additionally, this was also because of higher demand in GSH-91, E20, and E85 backed by increasing in the number of new registered personal car and E20/E85 gas station.

Outlook for 2015

- Mogas consumption is predicted to grow by 11.6% YoY supported by increasing passenger cars and low level of retail price.

Domestic Jet Demand

Thailand JET-A1 Demand

JET-A1 demand and # of flights

Relationship between aircraft movement and JP-1 demand

JET Demand Highlight

- In first 11 months of 2015, Jet consumption increased significantly by 9.8% over the corresponding period last year mainly owing to reviving tourism sector. The expansion in tourism sector was a result of the return of Chinese and Malaysia tourists during Chinese New Year and higher travel activities, pushing the number of flight movements higher both international and domestic aircrafts.

Outlook for 2015

- Jet demand growth is expected to surge by 9.0%YoY owing to returning tourists from improving global economy and stable politic situation in Thailand.

Domestic Gasoil and NGV Demand

Thailand Gasoil Demand

NGV Demand

Diesel Demand Highlight

- In Jan15-Nov15 period, Diesel demand rose gradually by 3.8% YoY as relatively low retail prices boosted the consumption amidst strong agricultural demand from the peaking of harvesting season. Nevertheless, demand growth was curbed by the decline in export orders from ASEAN, EU and China and slowly-than-expected improvement of domestic demand.

Outlook for 2015

- Diesel demand in 2015 is expected to expand by 3.4% YoY supported by reducing retail price and increasing new commercial car sales. However, gasoil demand was limited gain by concerns on in-recovery of Thailand's export sector.

NGV Demand Highlight

- In first 11 months of 2015, NGV demand declined moderately by 3.8%. This was mainly because of higher NGV retail price, which has increased to hit the record high at 13.5 baht/kg, and lower oil prices which reduced the fuel switching from old cars.

Domestic Fuel Oil Demand

Thailand Fuel Oil Demand

Thailand Fuel Oil Demand by Sector

FUEL OIL Demand Highlight

- In first 11 months of 2015, Fuel Oil consumption dropped significantly by 3.2% from a year earlier as a result of lower amount of maintenance day of natural gas fields from Myanmar comparing to the last year. Consequently, The demand of fuel oil in electricity sector was lower by 52.5%YoY. However, industrial demand increased by 2.9%YoY as a result of its lower price, while the demand from transportation sector increase significantly by 19.1%YoY.

Outlook for 2015

- Fuel oil demand is expected to dropped by 4.2% YoY following the government power develop plan (PDP) that aim to promote alternative fuel. Moreover, power plant also alternate to use natural gas instead of fuel oil thanks to lower price.

*Remark: Gas Field Maintenance Period in 2015

Yanada and Yetagun (10-19 April 2015)

Zawtika (20-27 April 2015)

JDA-Malaysia (21-24 July 2015)
