Review Report of Certified Public Accountant

To the Board of Directors of Thai Oil Public Company Limited

I have reviewed the accompanying consolidated and separate balance sheets as at 30 June 2007, and the related statements of income for the three-month and six-month periods then ended, and the related statements of changes in shareholders' equity and cash flows for the six-month period then ended of Thai Oil Public Company Limited and its subsidiaries, and of Thai Oil Public Company Limited, respectively. The Company's management is responsible for the correctness and completeness of information presented in these financial statements. My responsibility is to issue a report on these financial statements based on my reviews. The consolidated and the Company's statements of income for the three-month and six-month periods ended 30 June 2006, and the related statements of changes in shareholders' equity and cash flows for the six-month period then ended of Thai Oil Public Company Limited and its subsidiaries, and of Thai Oil Public Company Limited, respectively, were reviewed by another auditor whose report dated 11 August 2006 stated that nothing had come to his attention that caused him to believe that those financial statements were not presented fairly, in all material respects, in accordance with generally accepted accounting principles. As described in notes 2 and 12 to the financial statements, the financial statements for the three-month and six-month periods ended 30 June 2006 have been restated for the effects of the change in accounting policy for investments in subsidiaries and associates from the equity method of accounting to the cost method, and are now termed "separate" financial statements and the effects of the change in valuation method for crude oil and feedstock of the Company and its subsidiaries from last-in, first-out and first-in, first-out to weighted average in the consolidated and the Company's financial statements. I have reviewed the adjustments made to the consolidated and the Company's financial statements. Based on my reviews, nothing has come to my attention to indicate that those adjustments are not appropriate and properly applied.

I conducted my reviews in accordance with the auditing standard applicable to review engagements. This Standard requires that I plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit in accordance with generally accepted auditing standards. I have not performed an audit and, accordingly, I do not express an audit opinion on the reviewed financial statements.

Based on my reviews, nothing has come to my attention that causes me to believe that the accompanying financial statements are not presented fairly, in all material respects, in accordance with generally accepted accounting principles.

Thai Oil Public Company Limited and its Subsidiaries
Notes to the interim financial statements
For the three-month and six-month periods ended 30 June 2007 (Unaudited)

The consolidated and the Company's financial statements for the year ended 31 December 2006 of Thai Oil Public Company Limited and its subsidiaries, and of Thai Oil Public Company Limited, respectively, were audited by another auditor who expressed an unqualified opinion on those financial statements in his report dated 16 February 2007. As described in notes 2 and 12 to the accompanying financial statements, the financial statements for the year ended 31 December 2006 have been restated for the effects of the change in accounting policy for investments in subsidiaries and associates from the equity method of accounting to the cost method, and are now termed "separate" financial statements and the effects of the change in valuation method for crude oil and feedstock of the Company and its subsidiaries from last-in, first-out and first-in, first-out to weighted average in the consolidated and the Company's financial statements. I have audited the adjustments that were applied to the restatement of 2006 consolidated and separate financial statements and in my opinion these adjustments are appropriate and have been properly applied. The consolidated and separate balance sheets as at 31 December 2006, which are included in the accompanying financial statements for comparative purposes, are components of those financial statements.

12 Change in accounting policies

(a) Investments in subsidiaries and associates

The following change of accounting policy by the Company has no effect on the consolidated financial statements of the Group.

Until 31 December 2006, the Company accounted for its investments in subsidiary companies and associates in its financial statements using the equity method.

On 11 October 2006, the Federation of Accounting Professions (FAP) announced that the Thai Accounting Standard No. 44 “Consolidated Financial Statements and Accounting for Investments in Subsidiaries” is to be revised. FAP announcement No. 26/2006 requires a parent company which has investments in a subsidiary company, an entity under joint control, or an associate company, which is not classified as a “held for sale” investment, to record such investment in accordance with either the cost method or with the recognition and measurement basis for financial instruments (when an announcement is made), instead of the equity method currently used.

Starting from 1 January 2007, the Company has, accordingly, changed its accounting policy for its investments in subsidiary companies and associate companies in its separate financial statements from the equity method to the cost method. The change in accounting policy has been applied retrospectively and the Company’s 2006 financial statements, which are included in the Company’s 2007 interim financial statements for comparative purposes, have been restated accordingly.

(b) Inventories

The following change of accounting policy by companies has effect on the consolidated and separate financial statements.

Starting from 1 January 2007, the Company and its subsidiaries have changed their accounting policy in valuation method for crude oil and feedstock from last-in, first-out and first-in, first-out to weighted average.
